Hey look at our last challenge

Task briefing: Sometimes the fastest way to geolocate an image is to track down the movements of the person behind the lens. I took the photo below, on 20 September 2023, at 08:11 local time.

Your task is to determine:
a) What device I used to take the photograph.
b) Where I was headed.
c) How far I was from the entrance of my destination.

you and download it from GitHub repo.
